## Mente Art Gallery

**Mente** Art Gallery is dedicated to decorative artwork creation and delivery. Here, we use art to add value to the walls and floors and make the surface, reflects the spirit and the taste of your home and office. This is our philosophy at Mente to have a wide (360 degrees) insight over all cultures, lifestyles, tastes and artistic issues. Having a universal look with dynamic creativity, our team provides artwork which spreads out like a fluid foam to fill every corner of the space.

Our creative ideas are sometimes as heavy and deep as the civilizations of some thousand years while at other times we inspire the quick, light, growing and norm- breaking masterpieces of the third millennium.

We live in a world where creativity disappears boundaries and limitations, and so we always like to stay on the sharp edge of it. Some of our works, decorates your life with the light style, elegance, symmetry, balance and humility of Eastern art. Some others, will tell you about Greek epic stories, ancient myths and famous heroes. We create a piece which elevates the vibe. Some, are about thought and complexity... others only show reality.

2

Culture and ethnicity are the sources of inspiration in creation of our works in a rich lifestyle.

Here at "Mente", you can find works which are strongly influenced by the free spirit of Bedouin living beside the art that is found in European neo-classicism.

The world of "Mente" is constantly growing up and we feel proud for the reason of this growth: "diversity"

All the artworks at "Mente" are handmade. Some of them are created through conventional methods and by common materials and some are not. We use a variety of materials, paints, metals, leather, wood, different bulking agents and even fire to create unlimited number of effects. Some of our works shine in any place and share their inner art and spirit with the environment

and people. Some others, like a black hole, attract all the attention to themselves and create a stream of inhaling and exhaling in the atmosphere.

We create works which take the viewer away to show them the splendor and grandeur of the space. Meanwhile, we have works that invite audience closer for a romantic whisper.

So, in **Mente** we have a  
style of work for every  
taste and atmosphere  
which is both  
seductive and has  
secrets to reveal.

How Are Our  
Artworks Created?

**Designing** a new artwork at Mente, involves specific and technically approved process. We always consider a serious reason for creating a piece of art, and things here, never occur accidentally or without having a story behind them. Each of these artworks is part of a bigger group which inherits its characteristics. We categorize works by genre and subject. However, in some cases where the technique of creating the art is significant, we may recognize the group of products based on the technique.

#### **The Most Important Groups:**

- Animals
- Modern Art
- Decorative
- Leather
- Nature & Flowers
- Calligraphy
- Relief
- Gold Silver and Cooper Leaf
- Women
- Limited Edition

**Modern and Decorative** categories are certainly standing among our leading collection of works. In these two groups, customers can find works in various contents such as architecture, industry, cities, love, family, ethnicity, fashion, lifestyle and so on. There is also a wide range of abstract works in these two main groups that can fascinate any audience.

10

The next groups of our products in terms of variety are **Nature**, **Animals** and of course **Relief** and **Leaf**. In "Nature" you can see a unique variety of natural landscapes and flowers. Our Animal group is undoubtedly the most comprehensive and diverse collection of works on the subject of animals, especially horses, one can find in any galleries. This is surely a special and luxurious collection.

**Calligraphy** group is the haven for lovers of the great art of calligraphy. We have great artists working in this genre who have dedicated themselves to the development and promotion of this style from the East.

Another outstanding and unique group is **"Women"**. We create the works in this case with great care and obsession. They are huge, complex and glorious. Some of the works in this group are considered as our biggest and most valuable products and we are proud of them all.

At **Mente**, we are constantly thinking about developing and creating new genres, and when we make sure we have a lot of stories to tell in a genre, we introduce it as our new product group.

Unlike our other products, which are generated and replaced seasonally or even monthly, the **“Limited Edition”** group includes works for which only one sample has been created and there is no possibility of re-creating them. The products of this group have a higher artistic and long-term capital value. We issue certificates and identity cards for the works of this group.

Regardless of category and subject, the **performance technique** always makes the final value in the quality and elevation of the work. Our artists literally have no limits on technique. They take any device or color to create something. We may also use artificial colors, various layers of materials and resins or pieces of glass and even plaster and cement to produce the masterpiece. It totally depends on the subject, installation location, dimensions and finally the customer's will.

#### **Some Of The Common Techniques We Use:**

- Oil Color
- Acrylic Color
- Gold, Silver Leaf
- Relief
- Leather Burning Effect
- Wood Burning Effect
- Water Color
- Patina

At **Mente**, we allow **customers** to share their needs, ideas and specific orders with us. Many of our clients have made changes to the size, color combination, or even the technique of performing the desired artwork. We explore their needs and willingly create a custom art for them. These changes can be based on the dimensions of the space, the color combination or the type of decoration and even the customer's taste.

This is not the only service in this case for our clients. We have the ability to turn customers' wishes, ideas or proposals into a unique and extraordinary work. We can also work as a consultant with the project design team to design and produce works exclusively. It's up to you to tell us how much personalization you need. We are lovingly ready to create works that can make the world more beautiful.

## Mente Furniture

At **Mente** Furniture, we provide our experience, taste and ability in producing special works of art in different forms of furniture industry and volumetric decorative works. We started our cooperation with some specific and unique brands. In some cases, we just sell their products but in other cases, our skillful artists modify and change these products according to the orders we get from our customers.

We have gone through all these based on what we have perceived about the tastes and needs of our customers. Our long-term relationship with the clients of **Mente** products and close cooperation with leading architects and interior designers in MENA, have shown us that a collection of decorative products and custom furniture must be added to our products. This problem required a safe and effective solution.

We started to look for brands which produce furniture and decorative items. We checked the quality and details of their products and considered the history and philosophy of the brands. They were all brilliant, but as many of them were not compatible with our taste and design culture; We left them aside. This is our approach to choose the best.

We were even more strict about furniture. In order to choose a product which can be modified based on the needs of our customers, it was necessary for our team to evaluate the quality of the surfaces, their dimensions and the technique to be used. Techniques and the quality of our artworks are known and trusted by our clients and we are well- aware of this. So, this time we chose the most suitable ones among the best ones and this trend continues all the time.

We share our selected furniture with customers and enthusiasts through **Mente** Furniture social media pages every day so they can choose or share their desire with us... They just need to follow us.

## Mente Carpet

We have developed the design art and decorative philosophy of **Mente** to the floors of buildings. **Mente** valuable carpets which are woven from wool and silk, are totally eye-catching and creative. Moreover, due to their high quality, they can be used for long time. To achieve the combination of beauty, quality and durability; We use the most advanced machines and consider the latest carpet production methods. Our designers can apply up to **17 colors** in a very compact and dense texture. Thank to technology, we can produce carpets which are as delicate as handwoven silk ones, however, still some of our customers want details which can only be created by the hands of carpet artists. Therefore, in addition to fully industrial carpets, we also produce hand-woven and semi-hand-woven carpets.

Our semi hand-woven carpets are produced based on industrial carpets. In these carpets, there are details and designs which can only be performed by hand, using silk threads and custom colors. These carpets are made of wool and silk and are as delicate as hand-woven ones. They are as valuable and elegance as a work of art.

**Mente** handwoven carpets can be classified in the "Limited Edition" series. They are produced in limited numbers and are made entirely by hands of carpet artists. They may be woven entirely from wool or silk and can have a modern or completely traditional design. In any case, they are absolutely a unique work of art which can be placed on the wall or on the floor.

Our carpets will complete the process of decorating in **Mente** style. We consider them as works of art that are made to decorate the floors.

In the process of designing and production of **Mente** carpets, we have considered the possibility of customization and production based on the customer's request from the beginning. Our customers can order machine-made rugs by their desired size, color or even design. This is a unique feature provided through our direct access to the original source of production and our state-of-the-art machinery. Obviously, these customized orders can be accepted in high quantities.

However, in the production of handwoven carpets, we have limited this personalization to the order from the beginning and based on the design and wishes of the customers. Our handwoven carpets are produced in limited quantities and over a long period of time, and that's why they are highly valuable. So we don't repeat them. Our carpet weaving masters are ready to weave your personal design and order exclusively for you with love.

## Mente Studio

**Mente** Interior Design Studio is a hub to develop our work culture, elevate our artwork and share our design style. Through this studio, we help our customers to do the interior design of their residential unit or even a hotel in **Mente** style from the beginning to the end. This is a comprehensive architectural design service.

Our designers are from different cultures. They can design according to what the customers wish, and consider their taste, the function of the space and their culture. On the other hand, our good relationship with famous designers has provided us the opportunity to take the advantage of their advice and experience in our projects. This is only a part of our cooperation with them... A lot of prominent architects and interior designers are directly present at **Mente** Studio.

A project at **Mente** Studio begins with understanding the needs of customers, fully considering the function of the space, taking into account the dominant taste of the society and being aware of the design trends of the day. So, we never sacrifice the right function, light and shadow, the flow of movement inside the space, and of course the energy, to achieve beauty. In our opinion, architecture is about creating balance. Moving towards balance and creating balance is a global trend and we follow this movement.

At **Mente** Studio, our aim is to have beauty, detail, texture and proper functionality together and we try to consider respect for nature and humans. Our designers create spaces which truly have soul and are prepared for human presence.
